

SUMMARY

A Quality Assurance Engineer with hands-on experience in manual testing across various domains. Expert in validating software quality, functionality, and performance through meticulous testing techniques, including browser-based regression automation using Selenium. Proficient in tools like Postman, JIRA, and JMeter, with a proven track record of contributing to projects such as "EZFast Medical" and "C# Corner QA." Adept at API testing, performance testing, and defect tracking, ensuring seamless software releases and continuous improvement in product quality. Strong communication and leadership skills with a focus on delivering high-quality software solutions.

SKILLS

- Manual Testing: Test Case Design, Bug Tracking, Performance Testing, Smoke Testing, Integration Testing, Regression Testing.
- Web Technologies: HTML, CSS, JavaScript.
- Programming Languages: C++, Python
- Performance and Load Testing: JMeter
- API Testing: Postman.
- Project Management Tools: Jira.
- Soft Skills: Adaptability, Public Speaking, Time Management, Communication, and Leadership Skills.

CERTIFICATIONS

- Python for Data Science | Coursera | Aug '23
- C++ | CipherSchools | Jun '23
- HTML, CSS and JavaScript | Udemy | May '22
- Python Certification from HackerRank | Udemy | Aug '22

EDUCATION

Master Computer Application (MCA)

Lovely Professional University | Phagwara, IN
2017 - 2020

Bachelor of Computer Application (BCA)

BRABU University | Muzaffarpur
2017 - 2020

ACHIEVEMENTS

- COD-A-THON-A Competition on Coding | Feb '23

PROFESSIONAL EXPERIENCE

Quality Assurance

MCN Solutions Pvt Ltd | Feb' 22 - Present

- Conducted manual testing for various software applications, ensuring quality and functionality.
- Performed API testing with Postman to validate system integrations and performance.
- Tracked and reported defects using JIRA, collaborating closely with developers for resolution.
- Performed performance and load testing using JMeter to assess the application's responsiveness under various conditions.

PROJECTS

C# Corner QA

A vibrant community for software and data developers. offering free eBooks, live sessions, articles, certifications, and expert-led forums. It focuses on providing valuable resources and fostering a collaborative community.

- Executed UI, functional, API and regression testing for a platform with over 3 million software and data developers.
- Collaborated with developers to resolve defects and ensuring a seamless user experience.
- Tested integration with third-party resources, including eBooks, certifications, and skill test challenges.
- Ensured high-quality content delivery through comprehensive end-to-end testing of features such as articles, blogs, Forums, and videos.

EZfastMedical

A platform that connects patients with licensed physicians to streamline the process of obtaining medical marijuana cards, ensuring privacy and quick approvals.

- Created and executed test plans for a platform enabling quick medical marijuana card approvals in the USA.
- Conducted cross-browser testing to ensure compatibility across multiple browsers and devices.
- Tested the patient-physician workflow, ensuring compliance with privacy and security standards.
- Performed performance testing to validate application stability under various load conditions.
- Collaborated with stakeholders to enhance user experience and ensure fast approvals of medical marijuana cards.
